TEA ROOM

UNITED STATES GOLD DOLLARS

United States One Dollar Gold pieces were struck from 1849 until 1889. Very few choice pieces in collectors' hands today. Many of the issues were very limited and saw a great attrition rate in circulation. We take great pride in the following selection in that a great many CHOICE PROOFS are offered here. Very seldom do so many of these coins with such incredibly low mintages come up for sale.

- 1 1849 Open Wreath, No "L". ABOUT UNCIRCULATED with four tiny marks in the field behind the head.
- 2 1849 Closed Wreath, With "L". CHOICE BRILLIANT UNCIRCULATED with almost full mint luster.

- 3 1849-D Open Wreath, With "L". UNCIRCULATED with few tiny surface marks, and evidence of having been cleaned at some time. Very Scarce this nice.

- 4 1849-C Closed Wreath, With "L". Choice ABOUT UNCIRCULATED with nice luster. Centers not fully struck up as usual with the mint. Very Scarce.

- 5 1850 GEM UNCIRCULATED with full frosty mint luster.
- 6 1850-D Choice ABOUT UNCIRCULATED with deep golden toning and proof-like surfaces. Slightly weak centers as usual but with perfect planchet that is rare for this date.

- 7 1851-C BRILLIANT UNCIRCULATED with nice luster and a sharp strike. Very Scarce this nice.

UNITED STATES GOLD DOLLARS

- 8 **1851-D** CHOICE BRILLIANT UNCIRCULATED with full proof-like surfaces and outstanding luster. Easily one of the finest known specimens for the date. Ex. Scanlon.
-
- 9 1851-O GEM BRILLIANT UNCIRCULATED with blazing full mint bloom. One tiny cut below neck.
- 10 1852 CHOICE BRILLIANT UNCIRCULATED with nice original luster.
- 11 1852-D Very Scarce coin with only 6,360 minted. Pleasing ABOUT UNCIRCULATED specimen with deep golden toning. Some die swelling in front of face due to clash marks and the breaking up of the die.
- 12 1853 ABOUT UNCIRCULATED with much luster still adhering.
- 13 1853-O Nice ABOUT UNCIRCULATED.
- 14 1854 Type 1. Choice BRILLIANT UNCIRCULATED with full luster, and one tiny rim bruise.

UNITED STATES INDIAN HEAD EAGLES

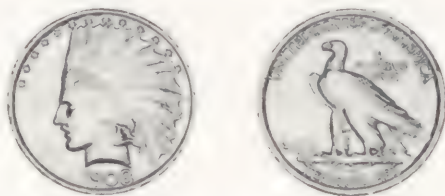

One of the most beautiful of all United States coins is the St. Gaudens design Indian Head Eagle. These were issued for only a short period of time, from 1907 to 1933. Few coins of many dates survived in choice condition, and are seldom available except when large old collections are offered. We are pleased to offer the following set as it represents many outstanding examples of several very difficult dates.

UNITED STATES DOUBLE EAGLES

United States Double Eagles or \$20 Gold Pieces were first issued for circulation in 1850, and continued to be issued through 1932. The Double Eagle is probably sought after by collectors more than any other denomination of U. S. Gold. Only rarely do major collections of Double Eagles appear on the market. We have not been able to offer such a complete run of dates and mints since our J. F. Bell Sale at the Central States Convention in 1963. Since that date only a few sales such as Miles and Gilhousen can match this sale in scope. We think that it will probably be several more years until many of the rarities listed herein may again appear on the market.

LIBERTY HEAD DOUBLE EAGLES

- 97 **1850** First year of issue for circulation. **CHOICE ABOUT UNCIRCULATED** with much original luster and a minimum of field marks. -

- 98 **1850-O** Very pleasing **ABOUT UNCIRCULATED** specimen with nice luster and some light field marks. An exceptionally high grade example of this scarce first year issue.
-

LIBERTY HEAD DOUBLE EAGLES

- 102 **1854-S** **Choice EXTREMELY FINE** with much luster and very few light bag marks. Rarely seen this nice.
-

- 103 **1855-O** Very scarce date with only 8,000 struck, this being **EXTREMELY FINE** with much luster and some light handling marks in the fields. Ex. Gilhousen #857.
-
- 104 **1855-S** Sharp appearing **ABOUT UNCIRCULATED** with no signs of wear; however, the surfaces are granular due to having been in salt water for a number of years. The overall condition is far above the average seen for the date.

EXCESSIVELY RARE 1856-O

- 105 **1856-O** The RAREST of the "O" mint double eagles, and one of the rarest of all Liberty double eagles. This coin is a choice **VERY FINE** with a tiny scratch having been removed from the field in front of the face. Only a few specimens of this date have been offered in several years, and is actually found less often than the 1854-O or 1870-CC, and even the Proof-only dates seem to appear more often. Ex. Gilhausen #860, 1974 A. N. A. #973.
-

- 106 **1857-O** **EXTREMELY FINE** with some bag marks, and nicely struck. Nicer than the Walton, Bolt and Wolfson specimens. Ex. Copeland, Scanlon.
-
- 107 1858 **CHOICE EXTREMELY FINE** with considerable mint luster and very nice surfaces.

-

- 111 **1861** **BRILLIANT ABOUT UNCIRCULATED** with nice luster.
-

- 112 **1861-O** Very pleasing **EXTREMELY FINE** specimen with much original luster. Some light field marks and the usual weakness at the bottom of the date. Ex. Gilhausen #875.
-

EXCEPTIONALLY CHOICE 1861-S PAQUET

- 113 **1861-S** Tall letter reverse, designed by A. C. Paquet. Very few specimens known, and the vast majority are only Very Fine. - 118 1866-S **With Motto. First Year of the type. Virtually EXTREMELY FINE** with the shallow strike of the period. Some surface and bag marks.
-

- 119 **1867** **BRILLIANT UNCIRCULATED** with lovely frosty surfaces showing only light bag marks. Very pleasing example of the With Motto type.
-

- 120 **1868** **CHOICE BRILLIANT UNCIRCULATED** with proof-like surfaces having a minimum of bag marks. Cheek shows light burnishing marks to remove scratch; however, it is virtually impossible to see without a glass.
-
- 121 1868-S **Lustrous EXTREMELY FINE** with some light bag marking. Typical shallow strike of the period.

LIBERTY HEAD DOUBLE EAGLES

- 122 1869-S Choice ABOUT UNCIRCULATED with much luster. Shallow strike as usual with only small bag marks.
-

EXTREMELY RARE 1870-CC

- 123 1870-CC THE RAREST OF ALL CARSON CITY GOLD PIECES. The First Year of issue for the mint with only 3,789 coins having been struck, and probably less than 30 known. All coins of this date and mint are flat strikes. This specimen is a nice VERY FINE with some bag marks and very light rim bruises as to be expected on a double eagle in this condition. Easily on a par with the majority of the known specimens. Should see spirited bidding as it is one of the most sought after of all the regular issued U. S. Gold coins.
-

-

- 129 1874 Choice BRILLIANT ABOUT UNCIRCULATED with considerable mint luster and some light surface marks.
-

- 130 **1874-CC** An outstanding specimen for the date, being BRILLIANT UNCIRCULATED with almost full luster and only a few bag marks, one being in the field to the left of the ribbon.
-

- 131 1874-S CHOICE BRILLIANT UNCIRCULATED with full proof-like surfaces.
-

LIBERTY HEAD DOUBLE EAGLES

-
- 132 **1875-CC CHOICE BRILLIANT UNCIRCULATED** with full frosty mint bloom. An almost unheard of condition for a "CC" mint twenty. Ideal for the date or mintmark collector.

PROOF-LIKE 1882

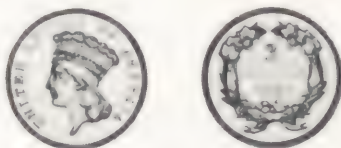

- | | | |
|-----|------|--|
| 277 | 1882 | Virtually a GEM BRILLIANT UNCIRCULATED example with Proof-like fields and frosted devices — a "first strike." This is the variety with the blundered "2" in the date, probably the result of a mint employee misaligning the digit punch when he was adding the date to the die. This is frequently called the "overdate" variety. |
|-----|------|--|
-

- 278 **1886** CHOICE BRILLIANT UNCIRCULATED with Proof-like luster and very nice surfaces. Outstanding example of a date that is seldom seen this nice.
-

EXCESSIVELY RARE ERROR PROOF

- 279 **1887** BRILLIANT PROOF with some light surface handling marks. A MOST UNUSUAL coin since the reverse impression is seen over a 180-degree rotated earlier strike! Apparently, the coins were struck with the reverse die inserted in the press at a one-half rotation from normal. Then, when the coins were examined, the error was noticed. The reverse die was then re-aligned to its proper position in the press, the coin was placed back between the dies and given two or more successive blows. However, the obverse was not fitted properly to its original striking position as it, too, shows about a 5-degree overstrike with some of the "original" letters and bust showing beneath. If the reverse of the coin is turned "upside down," the undertype "3," the word "Dollars" and the date can be seen without the aid of a glass. This error was first discovered in 1965 and an example of the coin appeared in a Lester Merkin sale in November of that year. Since then, this and one other specimen have come to light, making this one of ONLY THREE KNOWN SPECIMENS (perhaps the three Proofs that were struck in September, 1887?). Obviously, 1887 was not a very "good" year for Proof production by the Mint, since another major error, the 1887/6 three-cent nickel, exists. Ex. Lester Merkin, June, 1971, Lot 847.

These magnificent large gold coins, issued in conjunction with the Panama-Pacific Exposition held in San Francisco in 1915 to commemorate the opening of the Panama Canal, are the **LARGEST DENOMINATIONAL COINS** ever issued by the United States mint.

A total of 3,000 pieces were minted in the single 1915 striking at the San Francisco Mint. However, when only 1,128 were sold to the public at the Exposition, the remainder were returned to the mint and melted. The Fifty Dollar Gold coins, at the inception, thus became the second rarest denominational coins ever issued by the U. S. Mint, diminished only by the sublime Four Dollar Gold Stellas, of which 450 were struck in 1879 and 1880.

Some of these heavy coins, weighing 2.68 ounces, were carelessly mishandled over the years, thus incurring wear, edge bruises, scratches and other abrasions. Others were even soldered for jewelry, some were lost, and inconspicuously, some were even turned in for redemption during the great gold recall of 1933.

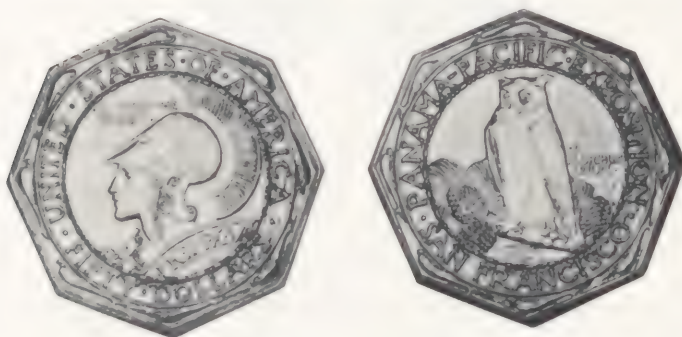

A great deal of speculation has been put forth as to exactly how many of the Pan-Pac Fifties are still in existence and how many are collectible. It has recently been the general consensus of opinion that probably less than 200 sets exist. Taking into consideration the number of sets and single pieces housed in museums, private and institutional permanent collections, probably only half that amount are available to collectors, and of that amount, probably only 10 to 15 coins are available on the market at any given time. There is recent evidence of accumulation of these rarities by investment syndications, so any prolonged activity by this new and burgeoning element of coin collectors may remove these coins forever from a price range still palatable to the aesthetic collector.

PRIVATE AND TERRITORIAL GOLD

Deriberpe, an engraver) below, around a beaded circle enclosing the value "1 Dollar" and date. **EXTREMELY FINE** but with a reverse dig and edge bruise.

UNITED STATES PATTERNS

This particular series is one of the most popular and interesting in the entire United States realm — beautiful designs that never were, noble experiments in metallurgy, off-metal trial strikes of the regular issues and attempts aimed at reducing the problem of counterfeiting. They were struck in the proper metal of the denomination, or in the less expensive, base metals. And they represent the legacy of the designer's and coiner's art.

Their low mintage makes them all the more desirable, and in most cases less than 50 pieces were originally manufactured of a given design/metal combination. They were underrated for many years, and only recently have they been recognized for what they are — truly **RARE** pieces. They have started to come into their own, but there are still many "bargains" to be had when their true scarcity is fully considered.

All pieces carry a "Judd number" from his definitive reference work on the subject, **United States Pattern, Experimental and Trial Pieces**.

TEA ROOM

UNITED STATES TYPE COINS

HALF CENTS

- 393 1794 Choice ABOUT UNCIRCULATED with very pleasing rich dark brown surfaces. The obverse is especially nice, with the hair detail being exceptionally sharp. The reverse is also well-struck, with some tiny handling marks and some evidence of clashed dies and a small edge nick. Very acceptable specimen of this date.
-

- 394 1806 Small 6, Stemless. UNCIRCULATED with some mint red mellowing to tones of light brown and olive. Rather sharply struck for this date with the reverse being especially nice.

- 395 1835 GEM BRILLIANT UNCIRCULATED with almost full blazing mint red! Only in a few places is the original color beginning to fade to a light brown. Unusually choice surfaces with some minor evidence of die clash—ing present. A fine example of the Classic Head style.

LARGE CENTS

1793 CHAIN CENT

- 396 1793 Chain, America. A VERY FINE example for this popular and scarce type coin. One of the first regularly-issued U. S. coins, this cent's design was soon scrapped because many people felt the chain that appeared on the reverse was more representative of bondage than of unity. There are some edge nicks and light bruises and the typical slight weakness in the hair, but overall it is a very acceptable specimen.
-

LARGE CENTS

- 397 1794 Evenly worn **VERY GOOD** with some detail claims to **FINE**. A very pleasing example for the type.
- 398 1802 Normal Dies. Chocolate Brown **UNCIRCULATED** with some mint luster adhering to protected portions of the devices. Rather well struck with pleasing smooth surfaces.
-

CONDITION CENSUS S-255

- 399 1803 S-255. 03 Close, Very Wide Date, Fraction Bar Too Far Right. Sharp mellow brown **UNCIRCULATED** with much original color in evidence about the lettering and devices, especially prevalent on the lower reverse. A few areas of dark discoloration, but really minor when the rest of the coin is taken into consideration. Apparently superior to the Naftzger specimen which was described as being of "Mint State sharpness and without wear, but the surfaces are very dark brown and have some light verdigris around the devices." This specimen would probably fit into about the middle of the Census, and is one that should see some spirited bidding.
-

WELL STRUCK 1812 LARGE DATE

- 400 1812 S-289. Large Date. Lustrous chestnut brown **UNCIRCULATED** with many traces of lightly faded mint luster around the stars, lettering and devices. Fully struck on an exceptionally pleasing planchet, only two tiny nicks (one on the chin, the other near the eighth star) away from sheer perfection. By far the finest example of this variety that we have had the pleasure of offering, and easily fits into the Census.
-
- 401 1814 Crosslet 4. Very **CHOICE EXTREMELY FINE** with lustrous surfaces. Most coins of this design style were struck on poor quality planchets owing to the alloy mixture used — this coin is an exception. The surfaces are nearly immaculate and without the usual porosity present. Very well struck.
- 402 1818 One of the Randall Hoard coins with the circular die break connecting the date and all stars. Deeply toned **UNCIRCULATED** in iridescent hues of deep gold, green, purple and magenta.

LARGE CENTS

- 403 1850 SUPERB GEM BRILLIANT UNCIRCULATED, mostly original mint red only beginning to fade slightly in areas. A beautiful example for the finest of collections.
- 404 1853 Iridescent toned UNCIRCULATED and rather well struck.

FLYING EAGLE AND INDIAN HEAD CENTS

- 405 1857 CHOICE golden toned UNCIRCULATED with all the details of the eagle's wing tips and breast feathers being sharp and bold. There are a couple of light tarnish streaks, perhaps due to alloy streaking in the blank planchet at the time of striking.
-

- 406 1859 A one-year-only variety with the laurel wreath and no shield on reverse. Virtually a GEM BRILLIANT UNCIRCULATED example with only a couple tiny surface nicks keeping it out of that category. Quite well struck with a whisper of golden toning enhancing the surfaces.
-
- 407 1883 Deep orange and golden toned CHOICE BRILLIANT PROOF.
- 408 1908 Deeply toned CHOICE PROOF.

LINCOLN HEAD CENT

- 409 1955 The Doubled Die Obverse. Sharp medium brown UNCIRCULATED with lighter, faded mint luster about the lettering and devices. A most popular date that is always in demand.

TWO CENT PIECES

- 410 1864 Large Motto. Lightly toned CHOICE red and brown UNCIRCULATED.
- 411 1866 Blazing GEM BRILLIANT UNCIRCULATED with almost full original color and only a couple small reverse marks away from perfection. The reverse of this SUPERB example possesses some light golden-orange toning and is one of the finest examples of the type that we have been able to offer in quite some time.
- 412 1868 Deep brown UNCIRCULATED.
- 413 1873 Closed 3, Original. Choice lightly toned PROOF. The last year of issue for the denomination and scarce due to its low mintage. Ex. Lester Merkin, 1968, Lot 515.

THREE CENT NICKELS

THREE CENT NICKELS

- 414 1865 The first year of issue for this design type. CHOICE BRILLIANT PROOF with some light toning over the surfaces. Very SCARCE in this condition since the Proof coin was issued only in a relatively few of the later complete sets for the year.
-

- 415 1870 Choice lightly toned UNCIRCULATED.
- 416 1872 CHOICE BRILLIANT PROOF.
- 417 1873 Closed 3. CHOICE BRILLIANT UNCIRCULATED with some pale golden toning.
- 418 1879 CHOICE BRILLIANT PROOF, nearly of Gem quality.
- 419 1880 CHOICE BRILLIANT PROOF.
- 420 1880 CHOICE BRILLIANT PROOF. The ribbon ends and a few leaves are a trifle weak due to over-zealous polishing of the die.
- 421 1882 CHOICE BRILLIANT PROOF with some light gray and golden toning.
- 422 1883 CHOICE BRILLIANT PROOF with a light die crack on the reverse — not usually encountered on Proof coinage. Interesting!
- 423 1883 GEM BRILLIANT PROOF with some pale golden toning. Variety with die crack on reverse.
- 424 1886 A PROOF—only date, this example is a GEM specimen with beautiful surfaces.
- 425 1888 GEM golden-toned PROOF.
- 426 1889 The last year of issue for this denomination. CHOICE golden PROOF.

SHIELD NICKELS

- 427 1879 GEM BRILLIANT PROOF.
- 428 1880 CHOICE BRILLIANT PROOF with some very light toning.
- 429 1881 GEM BRILLIANT PROOF.
- 430 1883 CHOICE BRILLIANT UNCIRCULATED with some gold and blue peripheral toning.
- 431 1883 GEM PROOF with gold and blue toning, especially on the reverse.

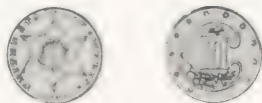

LIBERTY HEAD NICKELS

LIBERTY HEAD NICKELS

- 432 1883 Liberty Head type, no cents on reverse. This design was employed during only a small fraction of one year since many unscrupulous persons were gold-plating the coins and passing them as \$5 Gold pieces. **CHOICE BRILLIANT UNCIRCULATED** with frosty satin surfaces.
- 433 1895 Virtually **GEM BRILLIANT PROOF** with pale gold, blue and lilac toning. Ex. Lester Merkin, 1968, Lot 281.

THREE CENT SILVER

- 434 1853 One outline to star. **UNCIRCULATED** with some light surface marks. Minor evidence of die clashing and recutting which may account for some of the weakness.
-

- 435 1858 Three outlines to star. **GEM BRILLIANT UNCIRCULATED** with full mint luster. This variety is quite scarce in this top state of preservation. There is strong die clashing in evidence on both sides of the coin, a relatively common occurrence in this series.
-
- 436 1862 Over 1. Two outlines to star. The undertype "1" is quite visible with only slight magnification. **GEM BRILLIANT UNCIRCULATED** and fully struck. The coin possesses full, frosty mint luster.
- 437 1862 Frosty **GEM BRILLIANT UNCIRCULATED**. A coin that cannot be improved upon!

HALF DIMES

EXCEPTIONAL 1795 HALF DIME

- 438 1795 **SUPERB GEM UNCIRCULATED** with lustrous surfaces showing through the iridescent blue, green and golden toning. Virtually a **FULLY STRUCK** example with the eagle's feathers being far sharper than is normally found for this date. The amazing sharpness in the stars and hair detail is almost unbelievable. We are certain that only a very liberal bid will capture this prize.
-

HALF DIMES

BEAUTIFUL "LIBEKTY" VARIETY

- 439 1800 The "Libekty" variety, caused when a defective "R" punch was used when adding this word to the die. Gorgeous GEM BRILLIANT UNCIRCULATED with beautiful pink and lilac toning. SUPERB definition in the hair, stars and denticles and only a couple weak spots on the reverse caused by die wear or insufficient, uneven striking pressure. A small planchet flake near the eighth star is mentioned for the sake of accuracy, but does not deter from the overall attractiveness of this specimen. Sure to see some spirited competition for ownership.
-

PROOF HALF DIME

- 440 1829 BRILLIANT PROOF with mirror surfaces, even within the vertical stripes of the shield and letters of E PLURIBUS UNUM, and frosted devices. The lettering is sharp and square as are the edge reeds. The stars are also bold, with all but one showing full radials to the hollowed centers. Virtually a complete strike with only some light handling marks removing the coin from the Choice category. Very SCARCE and seldom offered.
-
- 441 1833 Proof-like GEM BRILLIANT UNCIRCULATED with every design detail being sharp and clear. As fine an example of this type as one could hope to acquire.
- 442 1835 Small date and 5c. Lustrous ABOUT UNCIRCULATED with a light scratch across the drapery. Ex. Lester Merkin, 1970, Lot 246.
-

LIBERTY SEATED HALF DIMES

GEM NO STARS HALF DIME

- 443 1837 Liberty Seated type, no stars on obverse, small date. Frosty GEM BRILLIANT UNCIRCULATED but for a light mark on the reverse. Lustrous surfaces with a beautifully immaculate obverse and a reverse that nearly measures up to that quality. A short-lived issue that is extremely popular among type collectors and scarce in this condition.
-

- 444 1840 No drapery from elbow. Very CHOICE UNCIRCULATED with some deep, mottled toning. Rather well-struck for the date.
-

LIBERTY SEATED HALF DIMES

- 445 1840 No Drapery from elbow. Beautiful GEM BRILLIANT UNCIRCULATED with the pale pink toning deepening to a dark blue as it approaches the periphery. Fully struck with immaculate surfaces.
- 446 1849 Overdate. The 9 appears to be over 8, as a double loop is in evidence, but a shifted inverted 6 could also be the culprit. CHOICE UNCIRCULATED with gray toning and several myriad die cracks on reverse.
- 447 1853 With Arrows at date. Lustrous CHOICE BRILLIANT UNCIRCULATED with frosty mint bloom. Apparently, the dies clashed and were repolished causing some minor loss of detail. A pleasing example of this popular type.
- 448 1859 CHOICE BRILLIANT UNCIRCULATED with some pale gold and lilac toning on the obverse.
- 449 1869 CHOICE BRILLIANT PROOF. What appear to be obverse hairlines are actually striations, present at the time of striking. Ex. Lester Merkin, 1968, Lot 520.
- 450 1870 BRILLIANT UNCIRCULATED with some light obverse toning and a few light surface marks.
- 451 1873 Closed 3. CHOICE BRILLIANT PROOF but for a light mark in the obverse field at the "T" in "United." The reverse is deeply toned.

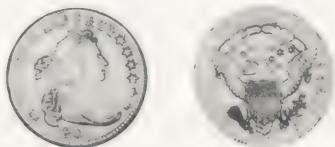

UNITED STATES DIMES

EXCEPTIONAL 1796 DIME

- 452 1796 Very CHOICE BRILLIANT UNCIRCULATED specimen, just a hair's breadth from a GEM rating. Very well struck with the obverse being especially bold (full separation in the hair strands, complete radials on more than half the stars and very strong edge denticles). The breast feathers are a trifle weak due to striking, and there is strong evidence of die clashing. A premium example of this RARE type in high grade.

LUSTROUS 1807

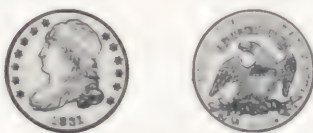

- 453 1807 Frosty GEM BRILLIANT UNCIRCULATED, a little weakly struck around the edges. This is somewhat of a turn-around, though, in that the centers are fully and completely struck, with the hair details and eagle's feathers being sharp and well defined! An exceptionally nice specimen that is truly worthy of your utmost consideration.

UNITED STATES DIMES

- 454 **1821** BRILLIANT UNCIRCULATED, nearly of GEM quality. The frosty mint luster shows through under some blue and gold peripheral toning, and all the lettering and devices are defined quite well. Should see some active bidding as coins of this calibre are being offered with less and less frequency.
-

- 455 **1831** Beautiful CHOICE BRILLIANT UNCIRCULATED with hints of Proof-like luster showing through. Fully struck and with unbelievable detail. A very desirable example of the type.
-

- 456 **1833** Sharply struck GEM BRILLIANT UNCIRCULATED with light golden toning and darker hues about the edges. A premium specimen deserving of a high bid.
-

LIBERTY SEATED DIMES

GEM NO STARS DIME

- 457 **1837** Liberty Seated type, no stars on obverse, large date. GEM BRILLIANT UNCIRCULATED with iridescent toning in shades of gold, blue and lilac. A fully struck example of this Gobrecht design which is both SCARCE and popular.
-
- 458 **1838** No Drapery from elbow. GEM BRILLIANT UNCIRCULATED with light gold and sea-green toning, especially on the obverse. Fine definition throughout with virtually every detail being sharp and bold.
- 459 **1847** GEM BRILLIANT UNCIRCULATED that has some very light golden peripheral toning. Well struck for the date and deserving of an appropriate bid.

LIBERTY SEATED DIMES

- 460 **1874** With Arrows at date. Nearly a GEM BRILLIANT UNCIRCULATED coin with beautiful light pink toning on nice surfaces. Well struck with Miss Liberty's head being especially sharp, something not always seen for this date.
-
- 461 1875 CHOICE Proof-like UNCIRCULATED with light gold and blue toning.
- 462 1877 CHOICE deeply toned UNCIRCULATED.
- 463 1882 CHOICE BRILLIANT PROOF with some pale golden toning and a few light obverse hairlines.
- 464 1883 GEM BRILLIANT UNCIRCULATED, lightly toned. A fine example with no impairments to detract from its beauty.
- 465 1883 BRILLIANT PROOF with some light hairlines.
- 466 1889 Deeply toned UNCIRCULATED, slightly weak struck in a few spots as usual.
- 467 1890 CHOICE UNCIRCULATED with deep gold, blue and green toning.

TWENTY CENT PIECES

- 468 1875-CC CHOICE BRILLIANT UNCIRCULATED, rather well struck for this date and mint.
-

PROOF-LIKE GEM 1876

- 469 **1876** SUPERB GEM BRILLIANT UNCIRCULATED with fully Proof-like surfaces. An absolutely gorgeous specimen with an unbelievably fine strike — even the most minute of details is present! The obverse of the coin is brilliant, while the reverse is toned with an iridescent sea-green color. This short-lived denomination lasted for a period of four years with circulation strikes being produced in two of those, and the total mintage for all pieces does not even reach 1.5 million. For these reasons, this coin is highly sought after, and a specimen of this quality would not have an easily-found equal. Superior to the example in our last C.S.N.S. sale that fetched a runaway price, this piece should be no exception.
-

UNITED STATES QUARTER DOLLARS

CHOICE 1796 SMALL EAGLE

- 470 **1796** The first year of issue for this denomination and the only year which has the small eagle on the reverse. **CHOICE EXTREMELY FINE**, well centered, being rather well struck especially on the obverse where the hair detail is quite bold. The light adjustment marks at the top of the reverse were applied at the Mint when a planchet's weight exceeded that which was allowed, and there is a tiny planchet defect below the drapery at the bust. A popular issue that is greatly in demand.
-

- 471 **1818** **CHOICE BRILLIANT UNCIRCULATED** with pale golden toned surfaces that are fully lustrous. Only some light surface scratches keep this coin out of the Gem category as it is otherwise fully struck with all details being bold.
-

- 472 **1828** Normal reverse. **BRILLIANT UNCIRCULATED** with almost full mint luster and Proof-like surfaces showing some light surface marks. Nice light golden toning around edges, with some dark streaking on lower right reverse. Pleasing example of this scarce type.
-

UNITED STATES QUARTER DOLLARS

- 473 **1831** CHOICE BRILLIANT UNCIRCULATED, only a small bag nick at the thirteenth star keeping it out of the Gem class. SUPERB, frosty surfaces that are otherwise devoid of any other impairments. The coin is completely struck up, and the satiny finish would almost appear as it did the day the coin left the Mint.
-

- 474 **1836** With heavily cracked obverse die. Frosty GEM BRILLIANT UNCIRCULATED and fully struck with pleasing mint luster. SCARCE in this fine state and worthy of a premium bid.
-

LIBERTY SEATED QUARTER DOLLARS

- 475 **1853** With Arrows and Rays. A CHOICE, lustrous UNCIRCULATED example of this one-year-only type. A few insignificant marks on the obverse with a pristine reverse. A RARE date to obtain in Uncirculated condition since most of these coins were put directly into circulation and stayed there.
-

BRILLIANT ARROWS AND RAYS

- 476 **1853** With Arrows and Rays. Another specimen, this UNCIRCULATED coin being nearly of GEM quality but for a few minute handling marks. The frosty surfaces possess nearly full, original mint luster with just a hint of light golden toning around the edges. This coin is expected to see some lively bidding before the final gravel falls.
-

LIBERTY SEATED QUARTER DOLLARS

- 477 **1854** With Arrows at Date. CHOICE BRILLIANT UNCIRCULATED with some light obverse surface marks. Nearly full mint luster and rather sharply struck.

-
- 478 **1854-O** With Arrows at Date. Pale golden toned CHOICE BRILLIANT UNCIRCULATED with pleasing satin surfaces that show only some minute handling marks visible under a glass. This two-year-only type with arrows and no motto on reverse is becoming increasingly difficult to obtain in nice condition.
-

- 479 **1857** SUPERB GEM BRILLIANT UNCIRCULATED. only slightly weak in the centers as is typical of the date, with some beautiful semi-Proof-like luster in abundance. The strike is far above average, though, and the immaculate blemish-free surfaces are graced by only a whisper of pale golden toning. A common date, according to mintage figures, but in uncommonly Choice condition.
-

- 480 **1873** With Arrows at Date. Fully Proof-like CHOICE BRILLIANT UNCIRCULATED with only some very minor surface marks keeping it out of the Gem category (these light marks sometimes tend to be over-amplified on a Proof-like surface). A popular and SCARCE two-year-only type coin.
-

- 481 **1874-S** With Arrows at Date. Frosty CHOICE BRILLIANT UNCIRCULATED that has only a few minute handling marks over otherwise pleasing surfaces. A very popular and scarce type coin.

- 482 **1875** CHOICE BRILLIANT UNCIRCULATED, fully frosty.

LIBERTY SEATED QUARTER DOLLARS

- 483 **1879** SUPERB GEM BRILLIANT UNCIRCULATED. An extremely choice example that has satin smooth, semi-Proof-like surfaces and beautifully frosted lettering and devices. Less than 14 thousand business strikes were produced during the year, and Uncirculated coins in this state of preservation surpass the scarcity of the more-available Proofs.
-

- 484 1879 GEM PROOF with very deep blue and violet toning.
485 1881 GEM PROOF, toned in shades of gold, blue, pink and violet.

BARBER OR LIBERTY HEAD QUARTER

- 486 1895-S CHOICE BRILLIANT UNCIRCULATED with a few light surface marks on the head removing it from a Gem rating. Fully lustrous and rather well struck.

STANDING LIBERTY QUARTERS

- 487 1917 Variety 1. CHOICE ABOUT UNCIRCULATED, rather well struck.
488 1917 Variety 1. BRILLIANT UNCIRCULATED with several curious "bulges" on the reverse — possibly caused by gas bubbles in the planchet at the time of striking.
489 1917 Variety 1. CHOICE BRILLIANT UNCIRCULATED, rather well struck with Full Head, and pleasing, lustrous surfaces.
490 1917-D Variety 1. CHOICE BRILLIANT UNCIRCULATED with Full Head.
491 1917 Variety 2. CHOICE BRILLIANT UNCIRCULATED with light golden toning.
492 1917 Variety 2. CHOICE BRILLIANT UNCIRCULATED with one-half Full Head. Lustrous surfaces with some faint tints of golden toning around the edge.
493 1919 CHOICE BRILLIANT UNCIRCULATED with Full Head.
494 1920 CHOICE BRILLIANT UNCIRCULATED. A little sharper than usually seen for this date with nearly Full Head.
495 1923 CHOICE UNCIRCULATED with some light toning.
496 1926-D Brilliant ABOUT UNCIRCULATED with nice surfaces.
497 1927 Toned ABOUT UNCIRCULATED.
498 1928 CHOICE BRILLIANT UNCIRCULATED.
499 1928-D CHOICE BRILLIANT UNCIRCULATED.

STANDING LIBERTY QUARTERS

- 500 1928-S CHOICE BRILLIANT UNCIRCULATED, the lower part of shield and eagle's breast being a trifle weak.
- 501 1928-S CHOICE BRILLIANT UNCIRCULATED with some slight weakness and a planchet defect at the top of the reverse.
- 502 1929 CHOICE BRILLIANT UNCIRCULATED.
- 503 1929-D Virtually a GEM BRILLIANT UNCIRCULATED example.
- 504 1929-S CHOICE BRILLIANT UNCIRCULATED.
- 505 1930 Lustrous ABOUT UNCIRCULATED.
- 506 1930 Lightly toned UNCIRCULATED with some minor weaknesses in striking.
- 507 1930-S Brilliant ABOUT UNCIRCULATED with only a touch of friction on the highest points.
- 508 1930-S Frosty CHOICE BRILLIANT UNCIRCULATED with about three-quarters Full Head.

UNITED STATES HALF DOLLARS

- 509 1795 VERY GOOD, but has been cleaned and the hair strands have been lightly re-tooled in spots.
-

- 510 1806 Pointed 6, stem through claw. BRILLIANT UNCIRCULATED with deep golden toning over very pleasing surfaces. Just the barest amount of friction on the highest points prohibits a better rating, but there is very sharp detail present on much of the coin (eagle's feathers, hair strands, some stars and shield). Certainly only a handful of these top grade specimens could exist today, and the increasing demand is far surpassing the available supply.
-

CAPPED BUST HALF DOLLARS

- 511 1808 EXTREMELY FINE to ABOUT UNCIRCULATED with some reverse peripheral toning.
- 512 1810 Brilliant ABOUT UNCIRCULATED.

CAPPED BUST HALF DOLLARS

- 513 **1814** Virtually a GEM UNCIRCULATED specimen with deep gray and steel blue toning draping the surfaces. Very sharply struck, in fact far better than usually seen, with full radials to the stars and exceptional feather detail. Definitely a high calibre coin.
-

- 514 **1815** Over 2, as all are. EXTREMELY FINE but has been cleaned or treated at some time leaving the surfaces gray in color and slightly porous. Nevertheless, a RARE date with a mintage of only 47,150.
-

- 515 **1824** Normal date. Choice toned ABOUT UNCIRCULATED.

- 516 **1825** Brilliant ABOUT UNCIRCULATED, rather sharply struck.

- 517 **1826** Extremely Choice ABOUT UNCIRCULATED with only the slightest hint of friction and full mint luster. About as close to Mint State as possible.
-

- 518 **1829** Lustrous GEM BRILLIANT UNCIRCULATED having some deep blue and gold toning about the periphery. Well struck and in full mint brilliance.
-

- 519 **1832** Lustrous ABOUT UNCIRCULATED with a field mark above the eagle's head on reverse.

CAPPED BUST HALF DOLLARS

- 520 1836 Lettered Edge. Very Choice ABOUT UNCIRCULATED, rather sharply struck with full mint luster.
-

1836 REEDED EDGE

- 521 1836 Reeded Edge, 50 Cents reverse. Struck with the new steam coinage presses and "closed collars" put into operation at the Philadelphia Mint during this year. Actually a pattern issue since the legislation authorizing the new weight and fineness did not come about until January 18, 1837. But with a mintage of 1,200 pieces (somewhat large for a true pattern issue) and the fact that a quantity of non-proofs were placed into circulation, this coin is collected as part of a series much like the 1856 Flying Eagle Cent and Gobrecht Dollars. RARE. EXTREMELY FINE with some insignificant surface marks and the surfaces being somewhat brightened by an old cleaning. Should see some active and spirited bidding.
-

- 522 1837 Reeded Edge, 50 Cents reverse. BRILLIANT UNCIRCULATED.
-

- 523 1838 Reeded Edge, Half Dol. reverse. Sharply struck toned UNCIRCULATED. A popular type coin with only a few light handling marks. Should see some active bidding.
-

- 524 1838 Reeded Edge, Half Dol. reverse. Very CHOICE BRILLIANT UNCIRCULATED with full mint bloom. Sharply struck with a hint of pale golden toning and a couple of deeper areas on the reverse.
-

CAPPED BUST HALF DOLLARS

- 525 **1839** Capped Bust type. Frosty CHOICE BRILLIANT UNCIRCULATED and very sharply struck. Quite a pleasing specimen for the type.
-

LIBERTY SEATED HALF DOLLARS

GEM ARROWS AND RAYS HALF

- 526 **1853** With Arrows and Rays. The extremely popular one-year-only design that is VERY RARE in this top state of preservation. A GEM BRILLIANT UNCIRCULATED example with pale golden toning enhancing the lovely surfaces. Only a couple minute handling marks on otherwise immaculate fields. Well struck with a myriad of die cracks and strong evidence of clashing on the reverse. This beautiful coin could easily see a runaway price for the date.
-
- 527 1854-O With Arrows at Date. UNCIRCULATED though not quite in full brilliance. Rather well struck with a better-than-average reverse.
- 528 1860-O GEM BRILLIANT UNCIRCULATED with Proof-like surfaces and some very light peripheral toning. Sharper strike than is normally found.
-

- 529 **1874** With Arrows at Date. GEM BRILLIANT UNCIRCULATED with beautiful, frosty mint luster. A very choice specimen of this difficult type.
-

LIBERTY SEATED HALF DOLLARS

- 530 1877-S CHOICE UNCIRCULATED, well-struck. Toned in various shades of blue, green and gold. There is some evidence of Proof-like luster under the toning, especially on the reverse.
-

- 531 1877-S A gorgeous GEM BRILLIANT UNCIRCULATED specimen with satin smooth surfaces that are somewhat Proof-like in nature. Fully struck and lustrous with fields that possess only the barest minimum of any sort of impairments. Again, a relatively common date according to mintage figures, but in uncommonly appealing condition.
-

BARBER OR LIBERTY HEAD HALF DOLLARS

- 532 1892 A BRILLIANT UNCIRCULATED example, nearly of GEM quality but for some minor marks on the cheek. A Proof-like obverse and satin reverse show through under the deep gold, blue, pink and lilac toning. The first year of issue for the Barber design.
-
- 533 1892 CHOICE PROOF with some light cloudiness over the surfaces.
- 534 1893 BRILLIANT PROOF with only some very light hairlines.
- 535 1899 CHOICE BRILLIANT PROOF with some light hairlines.
- 536 1903 BRILLIANT PROOF in which the area around the date has been abraded leaving rather heavy horizontal hairlines. The coin is choice otherwise.
- 537 1906 CHOICE BRILLIANT PROOF, a few minor hairlines visible.
- 538 1906 GEM BRILLIANT PROOF with a few minor die lint marks, as struck, and a couple of light hairlines visible only under a glass.
- 539 1907 CHOICE BRILLIANT PROOF.
- 540 1908 BRILLIANT PROOF with some minor hairlines visible under a glass.

BARBER OR LIBERTY HEAD HALF DOLLARS

- 541 1909 Virtually a GEM BRILLIANT PROOF example of this date.
- 542 1910-S BRILLIANT frosty UNCIRCULATED, nearly of GEM quality, with some light pink toning. Ex. Lester Merkin, 1968, Lot 738.
- 543 1913 BRILLIANT PROOF with a very light cloudiness on the surfaces.
-

- 544 1913 GEM PROOF, toned in shades of pink, violet, blue, green and gold, and with Liberty's head standing out in frosted contrast to the fields. A scarce date with less than 200,000 total pieces minted.
-

LIBERTY WALKING HALF DOLLARS

- 545 1937 BRILLIANT PROOF with a few light surface hairlines and tiny marks. Ex. Stacks, 1968, Lot 93.
- 546 1938 CHOICE BRILLIANT PROOF.
-

- 547 1938-D Nearly a GEM BRILLIANT UNCIRCULATED example of this scarce date of which less than half a million were coined. There are only a couple light surface marks on this frosty piece.
-

- 548 1942 CHOICE BRILLIANT PROOF with a few light hairlines.

FLOWING HAIR BUST DOLLARS

UNITED STATES SILVER DOLLARS

FLOWING HAIR BUST DOLLARS

- 549 1795 Flowing Hair type, 2 leaves under each wing. Sharpness better than **VERY FINE**, but not quite reaching **EXTREMELY FINE**. Surfaces are gray-white in color and there is a discoloration spot in the center of both obverse and reverse. A nice example for the type.
-
- 550 1795 Flowing Hair type, 3 leaves under each wing. Nearly **VERY FINE** with the obverse hair detail being flatly struck. There are several surface marks on the obverse and dark, mottled discolorations on both sides.

DRAPED BUST DOLLARS — SMALL EAGLE

- 551 1796 Small date, large letters. **VERY GOOD** to **FINE** with a planchet defect on the reverse edge and a surface nick under the eagle's right wing.
- 552 1797 9 stars left, 7 right, large letters. **VERY FINE** with bright surfaces due to cleaning at some time. Some minor field marks, but fewer than normally encountered for this date. With a mintage of only 7,776 pieces, the 1797 ranks in rarity only behind the 1794 Bust Dollar which saw less than 2,000 coins struck.
-

- 553 1797 Same variety as preceding. Nearly reaching **EXTREMELY FINE** in sharpness when the typically weak reverse is brought into consideration. The pleasing surfaces are virtually free of the annoying nicks and marks that often accompany this date. The edge denticles are strong and complete, again unusual for this date.
-

DRAPED BUST DOLLARS — SMALL EAGLE

- 554 1797 Same variety as preceding. **EXTREMELY FINE** with some slight weaknesses, as struck, yet still slightly above average. Surfaces are slightly gray-white in color and nearly free of nicks and marks that would detract from the overall appearance.
- 555 1797 10 stars left, 6 right. **FINE** to **VERY FINE** with two edge bruises showing at the top of the reverse. Some light surface marks, but quite an acceptable example for this date.

DRAPED BUST DOLLARS — HERALDIC EAGLE

- 556 1798 Large eagle reverse, wide date. **FINE** to **VERY FINE** with some surface nicks and marks.
- 557 1798 Same variety as preceding. Choice **VERY FINE** and rather well struck. Nice surfaces with an area of brightness on reverse, probably the result of something adhering to the surface and then being removed.
- 558 1799 Over 8, 15 star reverse. The 15 star variety was created when the engraver mis-punched two stars on the reverse (by placing them too near the clouds), then enlarged the end clouds to cover up his mistake. Only the tips of the extra stars were left visible. Very pleasing **EXTREMELY FINE** with much iridescent luster in evidence about the lettering and devices. Virtually all stars on the obverse show full radials, and the denticles on both sides are sharp and complete. The weak areas on the reverse are apparently due to striking and/or die wear since strong evidence of clashing is apparent.
- 559 1799 8 stars left, 5 right. Strong **VERY FINE** to **EXTREMELY FINE** with all the major detail being quite well defined. The obverse stars are sharp with many showing full radials. A few insignificant obverse edge defects are mentioned only for the sake of accuracy since the coin is a very pleasing overall specimen.
- 560 1799 7 stars left, 6 right. **FINE**-plus in detail sharpness, but has been cleaned, leaving the coin with a gray-white appearance. The field to the right of Liberty's face has also been smoothed down somewhat, apparently in an effort to remove some light marks.
- 561 1799 Same variety as preceding. Pleasing **VERY FINE** with some very minor surface marks. Surfaces are light gray in color and quite acceptable overall.
- 562 1799 Same variety as preceding with several obverse die breaks and some swelling at the shoulder — obviously, the die was retired from service shortly after this coin was struck due to excessive damage. This coin would tend to underscore early Mint economy whereby dies were used as long as possible before destruction. **EXTREMELY FINE** with many traces of luster apparent under gray and light golden toning.
- 563 1799 7 stars left, 6 right. **EXTREMELY FINE** with some light gray toning over the surfaces. Would make a nice addition to a high grade type set.
- 564 1799 Same variety as preceding. Choice **EXTREMELY FINE**, nearly reaching **ABOUT UNCIRCULATED** in sharpness. Virtually every strand of Liberty's hair is sharply defined, the only wear being behind the forehead and on the very topmost points. There is a tiny mark just above the shoulder on otherwise pleasing surfaces which are lightly toned in shades of gold and gray. Should see some active bidding.

- 565 1799 Same variety as preceding. Choice ABOUT UNCIRCULATED, not in full brilliance but with much original luster still in evidence. Minor planchet roughness at "BER" in Liberty, but rather well struck for this late die state variety. The obverse die, especially, was quite heavily cracked and shows clash marks, must have been well-used, and was probably retired from service shortly after this coin was struck! Interesting and SCARCE in this grade.
-

CHOICE 1800 DOTTED DATE

- 566 1800 The "Dotted Date" variety, so-called because of the numerous die flaws (rust marks) that appear on both obverse and reverse, but especially prominent in the date area. Very Choice EXTREMELY FINE to ABOUT UNCIRCULATED with only touches of friction on the highest points and only a couple tiny edge nicks. The hair detail is especially bold and about 95% of the strands show clearly. The stars are also sharp, with many exhibiting full radials, and the reverse detail is also quite clear. A premium coin worthy of a high calibre bid before the final gavel falls.
-
- 567 1800 VERY FINE with a minute weakness in the centers. Gray-white surfaces are free of major impairments as only a few light handling marks are present.
- 568 1801 Sharp FINE, nearly reaching VERY FINE in detail. Some light surface marks and mottled reverse toning.
- 569 1801 FINE with some spots of abnormal wear on reverse due to die bulging — obverse of the coin shows even wear with no indication of defects. Gray-white surfaces with some indications of light golden toning.

CHOICE UNCIRCULATED 1801

- 570 1801 CHOICE UNCIRCULATED with some hints of Proof-like luster in evidence beneath the deep, iridescently toned surfaces. The obverse features shades that range from deep gold to sea-green to steel blue, while the reverse is mostly subdued with scattered areas of mottled green-gold. The minor weaknesses are due to striking conditions, not wear or friction, and thus should not detract from the coin's overall desirability. A superior specimen that is sure to witness some active bidding.
-

- 571 1802 Over 1, wide date. VERY FINE with some light golden toning. Few light surface marks, but nothing of major consequence. The light edge "nick" at three o'clock, obverse, was caused at the time the planchet was run through the edge lettering device, therefore not to be considered a detraction.

- 572 1802 Over 1, Bolender 9. Called a RARITY 8 item by Mr. Bolender as only ONE SPECIMEN was known to him. Diagnostic characteristics for this "new" obverse: die flaw between B in Liberty and last curl in hair, and evenness between top left of undertype 1 in date with left side and foot of the 2. There is also a light die crack through bottom folds of drapery near point of bust to edge denticle. VERY FINE with nice surfaces and two small edge nicks on reverse. Should see some spirited bidding by the Silver Dollar specialists.
-

CHOICE 1802/1

- 573 1802 Over 1, Wide Date. CHOICE BRILLIANT UNCIRCULATED with almost full mint luster showing below some light steel blue and gray toning. Fully struck up and unusually choice for the type.
-

DRAPED BUST DOLLARS — HERALDIC EAGLE

- 574 1803 Small 3 in date. **VERY FINE** with some claims to **EXTREMELY FINE**. Cleaned at some time and now acquiring a pale golden color.
- 575 1803 Large 3 in date. Several of the details and the lustrous surfaces would suggest a grade of at least **VERY FINE** to **EXTREMELY FINE**. However, the coin is rather weakly struck on Liberty's Head and parts of the eagle. Only a few minor edge bruises on an otherwise pleasing example.

GOBRECHT DOLLAR — FLYING EAGLE REVERSE

SCARCE GOBRECHT DOLLAR

- 576 1836 Gobrecht Pattern. Name of designer on base, Plain edge. **EXTREMELY FINE** with two small marks in the obverse field. Evenly worn surfaces that have some very pale golden toning. A very acceptable example that would please either the type, pattern or dollar collector.
-

LIBERTY SEATED DOLLAR — NO MOTTO

PROOF-LIKE GEM 1861

- 577 1861 **SUPERB GEM BRILLIANT UNCIRCULATED** with immaculate surfaces that are Proof-like in appearance. There are just a few hints of some pale golden toning, and the coin is fully struck. Beautiful Seated Dollars of this type are becoming increasingly difficult to acquire, so an appropriate bid would definitely be in order.
-

LIBERTY SEATED DOLLARS — WITH MOTTO

LIBERTY SEATED DOLLARS — WITH MOTTO

- 578 **1869** Very CHOICE PROOF with a rainbow of iridescent toning including shades of blue, lilac, pink, gold and green. Well-struck and bound to see some active bidding.
-

- 579 **1872** Proof-like CHOICE BRILLIANT UNCIRCULATED that has nearly a complete strike and surfaces that are free of the normal bag or handling marks that accompany such large coins. A fine example of the type.
-

MORGAN TYPE SILVER DOLLARS

- 580 **1880-S** Proof-like CHOICE BRILLIANT UNCIRCULATED with mirror fields and highly frosted devices. Fully struck and having fewer of the surface marks that one would expect as normal.
-

- 581 **1883** CHOICE BRILLIANT PROOF with only some very light hairlines removing it from the Gem category. A well struck specimen.
-

PEACE TYPE SILVER DOLLAR

PEACE TYPE SILVER DOLLAR

- 582 1921 GEM BRILLIANT UNCIRCULATED with lustrous satin surfaces. Far better than the average strike with the usual weakness in the hair detail being more sharply defined than is normal (this phenomenon occurred when the planchet metal did not fill the high relief dies). Slightly superior to the specimen in our 1974 C.S.N.S. sale.

UNITED STATES TRADE DOLLARS

- 583 1878-S CHOICE BRILLIANT UNCIRCULATED exhibiting a very sharp strike with every feather on the eagle being well-defined. The lustrous surfaces are free of impairments save a tiny mark above the waves.

- 584 1878-S CHOICE BRILLIANT UNCIRCULATED with lustrous surfaces that are only a few tiny marks away from perfection. This example is especially well struck with every feather on the eagle being sharp and well-defined.

- 585 1883 Virtually a SUPERB GEM BRILLIANT PROOF specimen with highly frosted devices and fields that are almost totally free of the annoying hair-lines usually associated with this issue. A Proof-only date of which only 979 pieces were struck. Certainly only a fraction of that number can exist in this state of preservation today.

SUPERB SET OF CANADIAN SILVER DOLLARS

We are pleased to offer, in the following 42 lots, a **SUPERB** set of Canadian Silver Dollars from 1935 to 1966. This set easily measures up to the conditional quality of the grouping which appeared in our 1974 C.S.N.S. Sale. And, just as there were many new price records set in our last Sale of this material, we fully expect the same to occur in this year's offering. We undoubtedly will see active bidding and spirited competition by the "condition buff" and Canadian specialist alike.

What makes this selection all the more desirable is the inclusion of 13 **PROOF** PIECES struck prior to 1967! Most of the dates are offered so infrequently, and are so **RARE**, that many of even the most advanced collectors have never even seen them, or for that matter, are unaware of their existence. What complicates matters further is the fact that the Canadian Mint does not even acknowledge striking Proofs (or Specimens, if you will) prior to 1967 with the exception of sets for 1908, 1911 and 1937! But the Proof quality of the dates herein listed cannot be disputed—the fullness of strike, mirror finish in the fields and sharpness in the edges and details is simply amazing.

In the course of checking through several years of records, we can find only a handful of scattered dates being offered, further attesting to their true **RARITY**. And when a large group such as this appears for sale, it can definitely be considered a numismatic landmark. It may be many years before some of the dates will again appear, so please keep these facts in mind as you enter your bids.

Also note that we have taken the liberty to include price estimates for the Proof issues. These are included only for the bidders' convenience, and do not represent limits or maxima for the lots. They are meant only to be guides which our research indicates as being a close approximation of current values. But, again, owing to the true scarcity of these coins, and the fact that **GEMS** cannot be had of several dates for any price, please feel free to bid liberally if it is your desire to acquire these specimens.

|-----|------|---|
| 672 | 1935 | The first year of issue and one which commemorates the 25th Anniversary of the reign of King George V. Frosty GEM BRILLIANT UNCIRCULATED . |
| 673 | 1936 | New Obverse. Frosty GEM BRILLIANT UNCIRCULATED . |
| 674 | 1937 | King George VI. Frosty CHOICE BRILLIANT UNCIRCULATED with a small edge nick at top of reverse. |
-

- | | | |
|-----|------|---|
| 675 | 1937 | Superb, fully struck GEM BRILLIANT PROOF with a mirror obverse and satiny reverse. These coins were struck with both mirror and satin finishes, and apparently this is a "mule" of the two. A mere 1,295 sets issued during the year, and certainly only a fraction of that amount could have survived the factors of time and attrition. Deserving of a premium bid. (\$400.00) |

CANADIAN SILVER DOLLARS

- 676 1938 Frosty CHOICE BRILLIANT UNCIRCULATED.
- 677 1939 Commemorative struck in honor of the visit of King George VI and Queen Elizabeth. Frosty CHOICE BRILLIANT UNCIRCULATED, lightly toned.
-

GEM PROOF "RESTRIKE"

- 678 1939 GEM PROOF with deep gold, blue, pink and lilac toning draping the mirrored surfaces. The fullness in strike is almost unbelievable, with the steps, door and window openings, roof details and clock tower of the Parliament Buildings being sharp and clear. What makes this piece all the more interesting is the fact that it, apparently, is a later date RESTRIKE of the Proof issue (the term "restrike" may be a misnomer since the Canadian Mint does not fully acknowledge striking Proofs in 1939. Perhaps "fantasy restrike" or "unofficial restrike" may be more appropriate, though not able to be unequivocally proven correct). The numerous die rust marks present on both obverse and reverse would tend to point to the coin's later-date status. Since the 1939 Proof Dollar is known both with and without these rust marks, and since this variety seems to appear less often than the perfect die type, a higher bid should reflect the true RARITY of the piece. (\$2,500.00)
-

- 679 1945 Proof-like CHOICE BRILLIANT UNCIRCULATED with some light handling marks.
-

VERY RARE 1945 PROOF

- 680 1945 GEM BRILLIANT PROOF. An exceptional specimen of this VERY RARE date. The coin possesses a high wire edge with the reeding and all design details being sharp and bold. One of the more difficult dates to obtain in this grade, and bound to see quite active bidding. (\$2,000.00)

VERY RARE MAPLE LEAF PROOF

|-----|------|---|
| 685 | 1947 | Maple Leaf. GEM BRILLIANT PROOF with varying degrees of gold and blue toning resting on the surfaces. With only 21,135 pieces of this variety being minted in total, the quality of this coin only tends to enhance its value by many times. Sure to see some very spirited bidding. (\$3,000.00) |

RARE PROOF-LIKE 1948

- | | | |
|-----|------|---|
| 686 | 1948 | ET IND: IMP: omitted. The RAREST regular issue Canadian Silver Dollar with a total mintage of less than 19 thousand pieces! Proof-like CHOICE BRILLIANT UNCIRCULATED, comparable to the specimen in our 1974 C.S.N.S. Sale that brought \$1,400.00. |
|-----|------|---|
-

EXCESSIVELY RARE 1948 PROOF

- 687 1948 SUPERB GEM BRILLIANT PROOF! Absolutely immaculate surfaces with no impairments to detract from its beauty. The pale pink and golden toning only adds to the desirability of this gorgeous specimen. As a date, the 1948 Dollar is the **RAREST** regularly-issued coin in the series and, in the opinion of the cataloguer, only the 1911 Pattern Dollar (of which only two specimens are known) surpasses the scarcity of this piece! It is very difficult to evaluate a specimen such as this due to the infrequency of appearance, but it is safe to say that whatever the price may be at the final fall of the gavel, it most likely will be a bargain—the opportunity to acquire a comparable example may not again repeat itself. Quite likely to see a bid in the mid to high four figure range. (\$5,000.00)
-

- 688 1949 Struck to commemorate the entry of Newfoundland into Confederation. SUPERB Proof-like GEM BRILLIANT UNCIRCULATED with immaculate surfaces and full, complete strike. A beautiful example of this date.
-

- 689 1950 GEM BRILLIANT PROOF with fully lustrous, unblemished surfaces. Incomplete water lines to the right side of the canoe due to overpolishing of the die. Fully struck with high wire edge in evidence. Not often offered in this fine state of preservation. (\$1,000.00)
-
- 690 1950 Arnprior variety. PROOF-LIKE GEM with beautiful, defect-free surfaces.
- 691 1951 Arnprior variety. Immaculate PROOF-LIKE GEM.
- 692 1952 No Water Lines. PROOF-LIKE GEM.

CANADIAN SILVER DOLLARS

- 693 1953 Queen Elizabeth II. Wire Edge, no Shoulder Strap. Proof-Like CHOICE BRILLIANT UNCIRCULATED.
-

PROOF 1953 FLAT EDGE

- 694 1953 Flat Border with Shoulder Strap. GEM PROOF, lightly toned in shades of gold, blue and violet. Rather curious variety with incomplete water lines (apparently the result of overpolishing the die). Perhaps a specimen or presentation striking made during the first year the Queen's portrait appeared on the coinage. (\$500.00)
